❷RIC 欧瑞卡

OR-1800H / 2500H UV

1.8m / 2.5m Hybrid UV Machine (Ricoh Gen5/Gen6)

ORIC UV Ink

9 x G5/G6

Wide application: coils: soft film \cdot knife scraping cloth \cdot 3P cloth \cdot lamps \cdot canvas \cdot transparent film \cdot car sticker \cdot single transparent \cdot label sticker \cdot PET & PVC \cdot all kinds of cardboard \cdot gold and silver paper \cdot leather \cdot non-woven fabric \cdot wallpaper \cdot wall cloth, etc.; and ultra-transparent glass sticker and other advertising decoration materials to complete color white bronzing, frosted, hollow and other printing schemes!

Accessories		USB cable, media clamp, manual, drain bottle, ink cartridges, RIP software, etc.	

Technical Characteristics

- Standard extension platform, perfect competent to print both roll and rigid media.
- Cold light LED curing with tiny temperature variation ensures high printing quality.
- Adjustable head height, laser positioning system and movable printing platform result in high-efficiency printing jobs.
- Air-shaft take up system makes more stable paper collecting
- Stable printing technology and ink supply system reduces maintenance cost.
- International ICC standard with profile curve adjustment function.

Equipment parameters

Material height measurement system

Automatically detect the thickness of the material, adjust the printing height, and meet the printing of 35mm media height.

Front and rear expansion shaft receiving and discharging system

A more convenient receiving and discharge structure can meet a variety of materials of different thickness specifications.

THK high-precision silent dual rail

Effectively reduce the noise of the working environment and improve the printing accuracy and stability of the car.

High-strength transmission belt device - special high-strength low-tensile belt, no deviation, no deformation, long service life

Adopt an international universal ink supply system to ensure stable ink supply in high-speed printing.

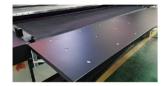

2.5L large ink barrel, automatic ink shortage alarm, timely reminder of ink addition

Double lung function

Automatic adjustment and independent white ink negative pressure system effectively avoid white ink droplets and other problems caused by negative pressure sharing, making white ink printing smoother.

Front and rear extension support frame
Perfectly realize the integrated printing of plates and
rolls, and realize the advantages of multi-purpose
one machine.

Vacuum suction platform control system

Partition suction platform: choose different regional air
cavities according to the size of the material to realize
the dual use of plate and coil.
