3-5 Layers printing layering technology is used for one-time molding in multiple schemes.

Color white color + hollow, bronzing, frosting and other multiple schemes can be combined, which can achieve color white color + hollow, color + hollow + bronzing, color white color + hollow + frosting, color white color + bronzing + frosting, color white color + hollow + bronzing + frosting and other effects, which can be printed and molded at one time through OR-1604EUUV. Meet the needs of more customers for the application of the ultra-transparent glass sticker scheme, reflect the new advertising performance method, and improve the added value of advertising.

3Layers printing the output is more delicate

With the interior light on, this three layers printing technology ‘Color + White +Color’ , can achive the magically changing effect of the patterns from backlight.The ability of switching the patterns through day and night, external and interiorfully reflecting the performance techniques used in new advertising era, thusincreasing the added value of your advertising.

One machine for multiple printing solutions under different color modes ,can meetrequire ments from different customers .It can also replace some high-end ecosolvent printers which can be efficient and environmental friendly.
