5xEpsonI3200-U1 Original nozzle with multi-layer printout application

Epson original nozzle can meet the multi-layer printing scheme of four layers (color white and black color) and five layers (color white and white color). A machine can print a variety of solutions in different color modes, which can meet the requirements of different customers.

4 Layer Printing layering technology for lighting and non-lighting pattern transformation effect

Performance before and after lighting

The unique "color + white + black + color" printing mode realizes lighting and no lighting, and the color performance is not natural. It replaces double-sided printing and one-time molding, which is suitable for various profile light box applications.

5 Layer Printing layering technology, double-sided application

"Color" + "White" + "Black" + "White" + "Color" application 5-layer printing to achieve opaque light. New application of double-sided window stickers can print different design patterns on both sides, and double-sided printing once!

Double ads are printed on one media, and the color is not transparent!
