

OR-1601 UV (With Single EpsonI3200-U1)

Single-head indoor and outdoor UV advertising printer

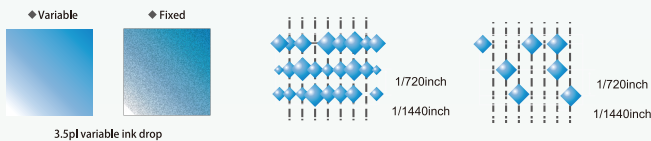

Small footprint | Excellent picture | High accuracy | Stable printing

Micro piezoelectric inkjet printing technology

The OR-1601UV is equipped with a single-headed original EpsonI3200 printing head, which adopts advanced board control technology, and the industrial-grade design ensures the durability of the print head. Epson i3200 1 x EpsonI3200-U1 head, original authentic, high quality, more exquisite printing accuracy than picture quality output, more cost-effective.

Intelligent inkjet printing technology and variable ink droplets ensure perfect UV printing output, greatly improve picture quality, and meet users' requirements for printing quality and image quality.

High-precision printing imaging expert

UV is a printing process of curing ink through ultraviolet light, which can be used in various materials. The surface forms a high hardness and high gloss printing effect. Make UV printing have higher It is wear-resistant and waterproof, and it can present a brighter and three-dimensional color effect.

- All intelligent work efficiency
- Variable ink drop technology, rich image quality imaging
- Worry-free after-sales service

Features and advantages of UV printer

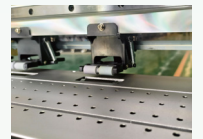

- Equipped with an I3200 head and using 3.5pl variable ink droplets, Epson's unique VSDT (variable ink droplet technology) can freely control the size of the jet ink droplets, thus reducing the graininess of the picture, presenting more picture details, smooth color transition and high saturation;
- 1.6m UV full-color special printer, printing coil materials are more extensive;
- Bright colors, strong three-dimensional sense, good wear resistance, strong waterproofness, good environmental protection;
- The lightweight single-head image made its debut, solving the problem of customer's site restrictions and small footprint.

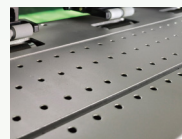

1.5L large-capacity ink supply system

Adopt high-quality silent rails

The lifting force of the integrated roller is uniform.

Super suction suction platform

Front image quality detection LED light guide board

The air cooling device is ready to dry.

Wide application: photo paper, back glue PP, oil canvas, single transmission, light cloth, car sticker, lamp, ultra-transparent, etc.

OR-1601 UV **TECHNICAL PARAMETER**

Model	OR-1601 UV	
Print head	Epson I3200-U1 x 1	
Color	CMYK	
Printing speed	4pass(720X1200dpi): 8 sqmh	6pass(720X1800dpi): 6 sqmh
Printing mode	Piezoelectric inkjet printing	
Medium	Broad width	1620 mm
	Thickness	1 mm
	Weight	60 kg
Print wide width	1600 mm	
Ink cartridge	Kind	UV ink
	Capacity	Direct supply system (1.5 liter ink barrel)
Curing unit	Air-cooled UV lamp	
Printing accuracy	2400 dpi	
Port	LAN	
Voltage	AC 220V ± 10%, 50/60 HZ	
Software	PhotoPrint	
Machine size	2585(W)x685(D)x1482(H) mm	
Machine weight	200 kg	
Environment	Power-on mode	Temperature: 15°C – 32°C / Moisture content: 35 – 80% (No condensation)
	Shutdown mode	Temperature: 5°C – 40°C / Moisture content: 20 – 80% (No condensation)
Attachment	Data cable, paper press, user manual, waste ink cartridge, ink cartridge, RIP software, etc.
